ABOUT US

Tag Art Global, LLC, makers of the Trailer Gator™, has created a brand leader in trailer protection. We pride ourselves as an innovator in this field. In 2005, the Tag Art Global, LLC management team saw a disturbing trend developing across the nation that included boat trailer theft and various other trailer theft. Thieves typically defeat the trailer owner's inferior lock with ease.

The strategy was to make a locking device that was virtually indestructible, affordable and easy to install. That strategy, along with the growing market of trailers throughout the United States, provided a need and desire to get into trailer coupler locking device manufacturing. Trailer Gator™ is considered the vanguard of trailer protection.

HOW IT WORKS

Trailer Gator™ securely fits around a trailer coupler and is locked in place with any of the various coupler locks on the market. Trailer Gator™ attaches in seconds and is designed for use while the trailer is detached from the vehicle and/or being stored.

KEY FEATURES OF THE TRAILER GATOR™

- Compatibility with multiple locks & padlocks, although we recommend the Master Lock No.37 Padlock.
- A hardened steel frame which defies cutting.
- A theft proof (anti-bolt cutter) technology; shackle guard protects against bolt cutters.
- A secure and precise fit around the coupler flange which leverages the coupler's own flange to prevent the Trailer Gator™ from being slid off.
- The Trailer Gator™ design prevents the coupler from being taken off and replaced by covering the bolts attaching the coupler to the trailer tongue.
- Fitment of most standard trailer couplers (excluding couplers with surge brakes due to the large "stepped" design, and excluding A-Frame trailers due to the fact that the coupler is typically welded on).
- Bottom plate on the Trailer Gator™ that prevents a trailer ball from being inserted into coupler.
- An internal hinge on the Trailer Gator™ which prevents external access and the possible compromise of the Trailer Gator™ by securing this critical component internally.
- Powder coated finish and internal hinge requires minimal to no maintenance.

It is our belief that The Trailer Gator™ is the best trailer coupler lock on the market. The simple yet rugged design of the Trailer Gator™ will guard the trailer from even the most motivated thieves. All other devices are a mere "bump in the road" for even the most inept thief armed with a ratchet, 10 minutes and a \$25.00 matching coupler.

TRAILER GATOR™ MODELS

MODEL TG-SH

- Weight: 6.59 pounds
- Color: Industrial Powder-Coat Red with Yellow Weather Matte decal
- This trailer coupler locking device is designed to protect smaller trailers.
- Fits couplers up to 4 1/8" (inches) wide and up to 9 5/8" (inches) long

MODEL TG-SM

- Weight: 7.85 pounds
- Color: Industrial Powder-Coat Red with Yellow Weather Matte decal
- Fits couplers up to 4 1/8" (inches) wide and up to 11 7/8" (inches) long

MODEL TG-L

- Weight: 11.52 pounds
- Color: Industrial Powder-Coat Red with Yellow Weather Matte decal
- This trailer coupler locking device is designed to protect larger trailers.
- Fits couplers up to 4 5/8" (inches) wide and 11 3/8" (inches) long

HELP ME CHOOSE

Through a few simple steps, we can guide you through your selection process and make sure you find the product that best suits your needs.

A-FRAME TRAILERS

Stop here. This coupler is typically welded to the trailer tongue. You need the Master Lock No. 37 Padlock, which is the next best coupler protection.

TRAILER COUPLERS WITH SURGE BRAKES

Stop here. The Trailer Gator™ is not designed for this complex trailer coupler. You need the Master Lock No. 37 Padlock, which is the next best coupler protection.

Important note: A very small number of trailers couplers are installed with extra long bolts attaching coupler to trailer tongue. Since the Trailer Gator™ must fully close around coupler, it may be necessary for you to install the proper size coupler bolts. We suggest that you install bolts that protrude just enough to fasten the nut. This is the bolt and nut that attaches coupler to trailer tongue.

WHICH MODEL IS RIGHT FOR ME?
